**Morley Hayes Leisure Ltd
Company Environmental Policy July 2008**

Morley Hayes Leisure Ltd believes it has a responsibility to protect the local and global environment in which it operates. We are committed to reducing our impact on the environment and working towards becoming a more sustainable business.

We will be honest about our performance and ensure our environmental policy and action plan are well communicated to our staff, customers and suppliers. We will provide a way for all of our stakeholders to add their ideas to our environmental action plan.

We will raise awareness, encourage participation and train employees in environmental matters, including an aspect of environmental awareness training in the induction process.

We will comply with all the requirements of environmental legislation and approved codes of practice.

We will regularly review and continuously seek to improve our environmental performance through the establishment and regular review of our action plan and policy. To help with this aim we will establish a steering group for environmental matters and appoint a company lead to ensure we stay focused on the task.

We will work towards reducing the pollution, emissions and wastes associated with our operations and reduce the use of all raw materials, energy and supplies.

We will expect similar environmental standards from all suppliers and contractors.

We will build partnerships with the local community where ever we can and liaise with the local community to ensure we are a positive influence on our local environment.

Some of our current practices include:

- Reusing our water bottles for all conference facilities
 - Recycling our glass & cardboard waste
- Dual flush toilets helping guests to save water
 - Light sensors in all guest rooms
- Recycling printer cartridges in the offices
 - Sourcing much of our food locally

We know we still have a way to go and over the next year we will try to:

- Recycle all of the paper from our offices
 - Monitor our energy and water use

For further details of how we monitor our environmental impacts please see our website www.morleyhayes.com or ask a member of staff for further details
